## Aspiring Cybersecurity Analyst & Network Administrator

alex.rivera.sec@protonmail.com | github.com/alexrivera-sec | linkedin.com/in/alexrivera-sec | Based in the United States, open to remote & on-site roles

---

### SUMMARY

Cybersecurity and networking learner building hands-on skill through the Cisco CCNA curriculum and the Google Cybersecurity Professional Certificate, with daily practice in Linux, Packet Tracer, and Wireshark. Documents every lab and project in public, including mistakes and fixes, and is looking for an entry-level SOC Analyst, Network Administrator, or IT Support role to build on that foundation.

### TECHNICAL SKILLS

**Networking:** IPv4/IPv6 addressing & subnetting, VLANs & trunking, static & dynamic routing, switching, NAT/PAT, ACLs

**Security:** CIA triad & security frameworks, risk management basics, SIEM fundamentals, packet/traffic analysis (Wireshark), authentication & access control

**Systems & Tools:** Linux command line, Packet Tracer, Wireshark, Git/GitHub, Bash

**Programming:** Python (learning), JavaScript, TypeScript, React, Next.js

### PROJECTS

#### Home Lab Network Segmentation with VLANs

*Packet Tracer · 2026*

Segmented a flat network into 3 VLANs with router-on-a-stick inter-VLAN routing; documented full configuration and verification.

#### Packet-Level Analysis of a TCP Handshake & DNS Query

*Wireshark · 2026*

Captured and analyzed live traffic, mapping each frame to the OSI and TCP/IP models.

#### Linux Log Monitor

*Python, Bash · 2026*

Built a script that parses auth.log and flags repeated failed SSH attempts from the same source IP.

### CERTIFICATIONS & COURSEWORK

#### Cisco CCNA

*In progress — Cisco Official Curriculum + Jeremy's IT Lab, Module 8 of 17*

#### Google Cybersecurity Professional Certificate

*In progress — Course 2 of 8*

#### Linux Essentials

*Self-paced — command line, permissions, shell scripting*

### EDUCATION

Self-directed technical study — networking, security, and systems administration
